School Security Assessments

Thank you for your consideration of utilizing Project Guardian in effort to make your organization safer and more secure for your patrons and staff.

Project Guardian is a 501c3 non-profit organization intended to provide security consulting services at little to no cost. Our assessments include a security audit and analysis by utilizing tools from organizations such as the Department of Homeland Security and standards from the National Fire Protection Association, OSHA, and ASIS International.

Our structured assessment process is designed to provide a tailored set of recommendations that reflect your unique security needs. This process includes gathering the relevant information through a site visit, interviews, etc. and conducting analysis of that information in order to develop the most appropriate recommendations for your organization.

This assessment covers the components that make up your physical security system:

What will you learn from this assessment?

This assessment will identify the vulnerabilities and gaps in your current physical security system, providing a clear evaluation of areas where improvements are needed. Our consultants will offer practical, actionable recommendations that can be implemented efficiently. We focus on cost-effective solutions, ensuring that security enhancements are attainable within your budget while still making a significant impact.

Our recommendations will align with your broader institutional values, ensuring that security measures integrate smoothly with your daily operations without disrupting the environment you've worked hard to build. These improvements are designed to strengthen your security infrastructure, offering both immediate protection and a long-term strategy for evolving risks.

If you need additional information, please feel free to email me at info@projectguardianusa.org

Thank you again for considering Project Guardian's services.

Sincerely,

Joseph M. LaSorsa
President
